Dr. Inhyung Lee was the Dean of the Graduate School of Financial Engineering, University of Suwon prior to his current post as Research Director of the Korea Capital Market Institute.

His published research papers include Characteristic factors and fund evaluation in Korea; Analysis of the cause of persistent deviation of IRP condition in the Korean swap market and its effect on the won-dollar foreign exchange market; and, Explaining the price anomaly of KRX preferred stocks, to name a few. Dr. Lee served in various capacities in several projects such as in ADB's Broadening the scope of Asian Bond Market Initiative under ASEAN+3 and Korea Exchange's Designing KONEX, new market for early start-up companies. He also served in public office task forces such as the Asian Capital Market Initiative Forum with the Ministry of Strategy and Finance; Domestic FX money market stability of the Financial Services Commission; and Professional review with the Presidential Committee for G-20 Summit.

He earned his BA in International Economics from Seoul National University in 1986. Both his masteral and doctoral degrees in Economics were obtained from Brown University in 1987 and 1992, respectively.
